

Data Erasure for Financial Services: The Last Line of Defense in Data Security

Financial institutions are prime targets for cybercriminals. As threat patterns evolve and become more sophisticated, your organization needs solutions that protect your data — and reduce the attack surface before a breach occurs. Blanco's data erasure solutions provide a last line of defense for data security with certifiable, audit-ready erasure.

- ▶ Blanco File Eraser
- ▶ Blanco LUN Eraser
- ▶ Blanco Virtual Machine Eraser

Reduce risk by automating data erasure in the cloud

Automate and schedule policy-driven erasure tasks across virtual machines, active storage, and hypervisor environments, aligned to your data-lifecycle policies.

Erase data without disrupting business operations.

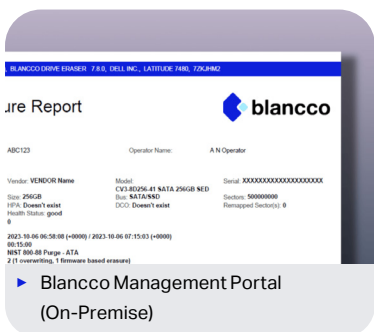

- ▶ Blanco Drive Eraser
- ▶ Blanco Mobile Diagnostics & Erasure
- ▶ Blanco Removable Media Eraser

Certified erasure for drives, removable media, and mobile devices

Erase sensitive data from drives, removable media, and mobile devices with Blanco's certified methods — aligned with NIST 800-88 and IEEE 2883 standards. Patented SSD erasure technology provides verified sanitization for solid-state drives.

Automatically detect and sanitize hidden areas (DCO, HPA, and remapped sectors).

Prove compliance with certified, audit-ready reports

A scalable enterprise system delivering centralized control, visibility, and auditable reporting for fully compliant data erasure around the globe.

Tamper-proof reporting created and stored for compliance, audits, verification, and long-term retention.

Blanco helps you stay compliant

Blanco enables compliance with key privacy and financial regulations — e.g., GDPR, GLBA, SOX, PCI DSS, HIPAA, CCPA — by integrating with your environment to automate policy-driven data erasure on your specific regulations and policies.

Satisfy global privacy regulations by erasing customer data and prove the secure disposal of consumer data from the IT equipment that contains it when it is repurposed, sold, or donated.

Show auditors that you have controls in place to safeguard financial data and securely erase it when the time is right.

Why Blanco for Financial Services?

We understand the need for heavily regulated industries to stay compliant with local and federal requirements. That's why we invest in a global team of industry-leading experts — ensuring you not only meet but exceed data protection obligations. Because with Blanco, secure erasure is more than risk mitigation. It's a promise — to your colleagues, clients, and partners — that their data, and their trust, will always be protected.

Sustainability: enable responsible, sustainable IT reuse

As the industry leader in certified data erasure, Blanco solutions deliver peace of mind:

- ▶ Support for 25+ global erasure standards, including NIST 800-88 and IEEE 2883.
- ▶ Compliance with the most rigorous requirements set by government agencies, legal authorities, and independent testing labs.
- ▶ Tested, certified, approved, and recommended by 13+ governing bodies worldwide.

Security: unmatched data erasure to protect you and your clients

Millions of drives are destroyed unnecessarily each year, adding to global e-waste. Blanco provides a secure, sustainable alternative:

- ▶ Repurpose, resell, or donate IT assets — extending life and retaining business value.
- ▶ Reduce reliance on destruction and lower the environmental footprint of IT disposition.
- ▶ Deliver reporting on the sustainability benefits of your program, including reduced e-waste and carbon footprint.

Compliance: align with global regulations with audit-ready proof

Financial institutions face the most demanding regulatory landscape. Blanco ensures compliance across global frameworks — including GDPR, PCI DSS, HIPAA, SOX, GLBA, and CCPA:

- ▶ Each erasure is verified and documented with tamper-proof, audit-ready reports.
- ▶ Alignment to leading standards such as NIST 800-88 and IEEE 2883 ensures defensible compliance for stringent regulators.
- ▶ Consolidated reporting simplifies audits and demonstrates effective data protection controls.

Efficiency: scalable control that saves time and reduces workloads

The exponential growth of data requires a scalable, efficient approach. Blanco empowers financial services organizations with automation, integrations, and global support coverage:

- ▶ Centralized control, visibility, and consolidated reporting across IT assets.
- ▶ Solution Engineers accelerate deployments and adoption through implementation, training, integration, and automated workflows.
- ▶ Certified Support ensures long-term operational success with multilingual assistance, proactive updates, and technical account management.

Together, these capabilities reduce redundant workloads and free IT teams to focus on higher-level strategy.
