

Blanco Drive Eraser for ARM

Market-leading Data Sanitization for Servers, Laptops and PCs with specialized capacity to handle ARM processors

Why Blanco

Blanco Technology Group provides organizations with secure, compliant, and automated solutions that accelerate the transition to the circular economy.

All erasures are verified and certified through a tamper-proof audit trail. With nearly 25 years of responding to customer needs and 35+ patented or patent-pending ideas, Blanco is the industry standard in data erasure and mobile lifecycle solutions. Our dedication to technological innovation empowers top-tier enterprises, IT asset disposition (ITAD) vendors, and mobile industry stakeholders to protect end-of-life data against unauthorized access, comply with data protection requirements, extend the useable life of IT assets, accelerate operations, and enhance the mobile customer experience.

Blanco Drive Eraser for ARM offers our premier data sanitization solution for devices, servers and data centers that rely on Advanced RISC Machines (ARM)

Does your need to sanitize your IT asset portfolio come with a caveat?

Blanco Drive Eraser, our market-leading scalable erasure software, answers this question with its adherence to our four Value Pillars; a guarantee of Security, Efficiency, Compliance and Sustainability. Our scalable software provides essential protection by permanently erasing sensitive data from data centers, servers, HDDs and SSDs (including NVMe in desktops/laptops/Chromebooks), with Intelligent Business Routing (IBR) workflows enabling automated erasure even while devices are disconnected from networks.

Blanco Drive Eraser for ARM offers all the benefits of Blanco's premier product - providing secure data sanitization to help prove regulatory compliance and the means to dispose of end-of-life assets as you see fit - while also helping you to work safely with ARM processors on energy-intensive A.I. projects.

Key Benefits

- ✓ Guarantees data has been erased from any drive (from HDDs and self-encrypting drives to SSDs and NVMe) that relies on specialised ARM processors
- ✓ Receive a tamper-proof audit trail for all assets, with a digitally-signed Certificate of Erasure for each erasure instance and timestamps to monitor each step of the process
- ✓ Reduce your environmental impact with an ARM processor-erasure solution that consumes less energy while still operating at faster rates
- ✓ Minimize manual processes with IBR workflows
- ✓ Full NIST compliance with support for NIST Purge and Clear, featuring full records of unsupported incidents for transparent auditing
- ✓ Delete sensitive data from SSDs without compromising drive functionality with PSID revert
- ✓ Create custom erasure standards during overwrites to meet your unique standards
