

Blanco Mobile Workspace Edition

Professional-grade mobile processing.

**Any Windows 11 workstation. Any operator.
Every stage of the mobile lifecycle.**

Why Blanco Mobile Workspace Edition

Any operator. Any location. Professional mobile processing — once limited to industrial-scale centers — is now available from any Windows 11 workstation.

Blanco Mobile Workspace Edition delivers certified erasure, diagnostics, grading, and intelligent device verification on any Windows 11 workstation—without the complexity, dedicated hardware, or infrastructure associated with large scale specialized processing environments.

Agile enough to be deployed wherever devices change hands, Mobile Workspace Edition enables consistent, professional-grade processing across the entire mobile lifecycle—from retail and enterprise IT to service centers, distributed locations, agile warehouses, and emerging processors.

As part of the Blanco mobile lifecycle suite every device processed through Mobile Workspace Edition contributes to a connected lifecycle record within the Blanco Management Portal, providing central visibility, workflow management, and audit reporting across your operation.

Key Benefits

- ▶ Professional-grade mobile processing without industrial infrastructure.
- ▶ Deploy on any Windows 11 workstation—no dedicated Linux environment or specialist hardware needed.
- ▶ Designed for any operator—guided workflows deliver consistent processing with minimal training.
- ▶ Agile enough for every stage of the mobile lifecycle.
- ▶ Certified erasure, diagnostics, grading, and intelligent device verification in a single workflow.
- ▶ Unique customer-facing certificate of data privacy.
- ▶ Identify MDM, Activation Lock, carrier lock, blacklist, and IMEI issues before devices move downstream.
- ▶ Scale from a single workstation to distributed processing operations.
- ▶ Connected to the Blanco mobile lifecycle suite through the Blanco Management Portal.

Key Features

Certified Erasure

NIST 800-88-compliant data sanitization with digitally signed certificates of erasure.

Diagnostics and Grading

Professional hardware diagnostics and grading to maximize recovery value.

Device Verification

IMEI, blacklist, finance, carrier lock, MDM, and Activation Lock checks.

Windows Deployment

Turn any Windows 11 workstation into a professional mobile processing station.

Centralized Management

Every operator, every site, every workflow, controlled through the Blanco Management Portal.

One Solution. Every Processing Environment.

- ▶ Retail and Front of House: Trade-ins, Early upgrades, Fault returns, customer data privacy, and instant certified erasure.
- ▶ Enterprise and Corporate Fleets: Fleet retirement with audit-ready compliance before devices leave the organization.
- ▶ Carriers and Service Providers: Verify devices and eligibilities for multiple services and identify locked or unsalable devices at intake.
- ▶ Distributed Locations: Deliver consistent processing across multiple sites with centralized deployment.
- ▶ Agile Warehouses: Professional processing without industrial infrastructure investment.
- ▶ Emerging Processors: Start with a single Windows workstation and scale as your business grows.

From front of house to warehouse— without breaking the chain.

Services eligibilities and device records (diagnostics, grading, certified erasure) flow directly from the operator layer into warehouse processing through the Blanco Management Portal.

**No duplication. No rework. No margin lost
at any point of the handoff.**

*This intelligence connection can transform how large
warehouse operations process mobiles.*

Closing Statement

The operator layer is the highest-value, most underleveraged point in the mobile lifecycle. Blanco Mobile Workspace Edition puts professional-grade certified processing exactly there.
