BLANCCO SUSTAINABILITY

Sustainable IT Starts with Certified Data Erasure

Every device has a carbon footprint. Blancco Certify replaces unnecessary physical destruction with certified data erasure, so working hardware stays in use, e-waste shrinks, and you have the proof for your ESG reports.

SECURE DEVICE REUSE
Erase the data, keep the device.
Redeploy, resell, or donate working hardware instead of shredding it.

IT ASSET CIRCULARITY
More second lives, fewer new devices.
Verified erasure builds the confidence to donate, resell, and trade in.

DIMINISHED ROT
Stop storing data you don't need.
Cut storage costs and CO2 by erasing redundant data.

E-WASTE REDUCTION
Keep electronics out of landfills.
Reuse keeps working devices in circulation, not in landfill.

BUILT-IN REPORTING
Put a number on your impact.
See the CO2 averted by every erasure, ready for your ESG reports.

CUSTOMER RESULT:

KOcycle

With Blancco as its exclusive data erasure partner since day one, KOcycle has built a business that puts responsible IT lifecycle management at the center of the circular economy—and the results speak for themselves. With Blancco, KOcycle:

- Saved over 5 billion liters of drinking water and 33 million kg of mined materials through second-life laptop remarketing in a single year
- Recycled 172,855 kg of technical equipment back into the circular economy during that same time
- Maintained an unwavering '0% to landfill' commitment across all processed assets
